SYED MUHEMIN ALI

FULL STACK & MERN DEVELOPER | GENAI & WEB/MOBILE SOLUTIONS

Karachi, Sindh, Pakistan • smuheminali@gmail.com • +92 347 2157880 • linkedin.com/in/syedmuheminali • github.com/syedmuheminali • syedmuheminali.vercel.app

PROFESSIONAL SUMMARY

Results-driven **Full Stack & MERN Developer** with **3 years of experience** architecting, deploying, and optimizing high-performance web and mobile applications using **React.js, Next.js, Node.js, Express.js, MongoDB, and React Native**. Demonstrated track record delivering complex commercial solutions and freelancing for **local and international clients**, as well as engineering **GenAI-powered SaaS applications** utilizing the **Google Gemini API**. Proficient in modern frontend workflows (Formik, Yup, Context API, Redux Toolkit, NativeWind) and production backend ecosystems (JWT, Clerk, Better Auth, Stripe payments, Cloudinary media processing). Passionate about scalable system architecture, clean modular code, responsive UX, and high-impact digital products.

TECHNICAL SKILLS

Frontend Technologies:	React.js, Next.js, React Native, NativeWind, Formik, Yup, Context API, Redux Toolkit, RTK Query, ReactTable v8 (TanStack Table), Tailwind CSS, Material UI, SASS, HTML5, CSS3
Backend & Cloud:	Node.js, Express.js, MongoDB, RESTful API Integration & Architecture, Cloudinary, Stripe Payment Gateway, Firebase
GenAI & Authentication:	Google Gemini API (AI Integration, LLM Prompts), JWT (JSON Web Tokens), Clerk, Better Auth, OAuth, Role-Based Access Control (RBAC)
Tools & Core Practices:	Git, GitHub, Vite, Postman, Vercel, Full-App Internationalization (i18n), Web Performance Optimization, Mobile-First Design, Clean Architecture

PROFESSIONAL WORK EXPERIENCE

Enkelbok — Karachi, Pakistan

Associate Software Engineer / Full Stack Frontend Developer — February 2024 – Present

Digital accounting and bookkeeping SaaS helping small and medium-sized enterprises automate billing, invoices, expense tracking, payroll, and financial reports.

- **Full-App Internationalization (i18n):** Implemented multi-language localization (English & Swedish) across entire portal, increasing global market accessibility and European client onboarding.
- **Real-Time Chat & Support Module:** Engineered real-time customer support module connecting clients with accountants, cutting query resolution time by 35% and improving customer satisfaction.
- **Form Validation & State Architecture:** Refactored multi-step financial input modules using **Formik and Yup** schema validation with **Context API** and **Redux Toolkit**, reducing input errors and form abandonment.
- **Table Performance Optimization (TanStack Table v8):** Migrated data grid architecture to **ReactTable v8**, boosting dataset rendering speed by 40% with virtualized rows and server-side filtering.
- **Automated Deadline Reminder System:** Built scheduled task & tax-deadline alert system with customizable milestones and automated notifications.

Independent Full Stack / MERN Developer — Remote

Freelance Software Engineer (Local & International Clients) — February 2023 – February 2024 (1 Year)

Delivered custom, end-to-end full-stack web and mobile applications for diverse startups and independent businesses across US, UK, and domestic clients.

- **Full-Stack Product Delivery:** Developed and shipped 6+ tailored client applications from scratch using **React.js, Node.js, Express, MongoDB, and React Native**, maintaining 100% on-time delivery.
- **Payment & Cloud Storage Integration:** Integrated secure billing pipelines using **Stripe** (one-time payments & subscriptions) and configured automated media asset pipelines with **Cloudinary** for fast CDN delivery.
- **Modern Auth & Form Architecture:** Implemented secure multi-provider auth using **Clerk, Better Auth, and JWT**, alongside robust client validation with **Formik & Yup**.
- **Cross-Platform Mobile UI:** Crafted sleek Android & iOS interfaces in **React Native** with **NativeWind (Tailwind CSS)** for unified style consistency between mobile and web platforms.
- **Client Collaboration:** Managed direct stakeholder communications, requirements gathering, sprint demos, and post-launch maintenance.

TecStik — Karachi, Pakistan

Associate Software Engineer — May 2023 – January 2024

Technology services agency delivering modern JavaScript web and mobile solutions for startups and enterprise clients.

- Engineered responsive, highly performant full-stack modules using the **MERN stack** and integrated RESTful endpoints with **RTK Query** and **Axios**.
- Developed cross-platform mobile views using **React Native**, optimizing UI render performance and eliminating frame drops on low-end Android devices.
- Standardized global state management using **Redux Toolkit and Context API**, enhancing codebase predictability and team velocity.

Deskwork Solution — Karachi, Pakistan

MERN Stack Developer Intern — January 2023 – March 2023

- Assisted senior software engineers in writing RESTful APIs in **Node.js/Express.js** and designing MongoDB collections.
- Created reusable React components and improved mobile responsiveness following clean code principles.

FEATURED PROJECTS

Gen AI + Full Stack SaaS Platform — Live Demo ↗ GitHub Repository ↗

Full Stack Developer | Vite, React, SASS, Node.js, Express.js, MongoDB, JWT, Gemini API — Production Deployment

- **AI-Powered SaaS Architecture:** Engineered an end-to-end AI platform delivering **Automated Resume Analysis** and **Personalized Interview Preparation Strategies** tailored to candidate job profiles.
- **Google Gemini AI Integration:** Built custom backend prompt-engineering pipelines interacting with **Google Gemini API** to parse resumes, highlight ATS gaps, and generate actionable interview coaching frameworks.
- **Secure Authentication:** Implemented robust **JWT (JSON Web Token)** authentication with protected routes, secure HTTP-only cookie handling, and encrypted password hashing.
- **Resume Download & Export Engine:** Created seamless in-browser resume generation and export functionality allowing users to download optimized, ATS-ready resumes directly.
- **Optimized Full-Stack Delivery:** Built frontend using **Vite + SASS** for rapid build times, backed by modular **Express.js / MongoDB** RESTful micro-services hosted on Vercel.

EDUCATION & CERTIFICATIONS

Web & Mobile Hybrid Development Certification — BMJ Institute of Computer Science	2022
Linux Professional Cisco International Certification — Cisco	2020
Responsive Web Design Certification — FreeCodeCamp	2020
Intermediate Education (Pre-Engineering / Computer Science) — Nabhi Bagh Z.M Govt Science College	2018
Secondary School Certificate (Matriculation in Science) — Bright Future Academy School	2015
